United States TSA Requirements for Flight Schools

Notice: The United States Department of Homeland Security requires the following from all flight schools operating in the United States:

- Identification of any and all students learning to fly at the flight school
- A form of identification that assures the TSA that a student taking flight instruction is a citizen of the United States
 - Birth Certificate, and/or
 - Passport (current)
- TSA authorization for flight training if the student is not a citizen of the United States
 - Full TSA application to train
 - All documents printed involving the request for flight training
 - A picture taken at the flight school (not a Visa or Passport Picture) of the student
 - Note that this also includes international customers who are requesting an introductory flight

These requirements do not include customers who are just renting aircraft from Ahart Aviation Services but if the customer decides to train for an FAA certification, these document(s) must be collected before the training begins

Thank you

Ahart Management
